

Arbor Canopy

Manufactured to suit customer requirements, the Arbor Canopy is constructed from a mild steel frame, hot dipped galvanised as standard and can be powder coated in a wide range of RAL or BS colours.

This is a popular and flexible member of the SkootStor range of products. The roof is clad with UV stable PET sheeting, and this canopy is available as surface mounted or sub-surface fixed, ideal for a wide variety of purposes and spaces, protecting customers, employees, or pupils from the weather.

Manufactured to suit customer requirements.

Stadium Canopy

The Stadium Canopy is the latest addition to our canopy range and is an adaptation of our popular **Arbor Canopy**.

This new design features a "Stadium" shaped corrugated steel roof that has a subtle slope to the rear to divert rainwater into the aluminium drainage system.

To minimise movement the canopy utilises below ground fixings and a branching structure to secure the canopy in 8 points. The result is a highly durable canopy that can withstand strong winds and weather conditions.

The Canopy features a vandal-resistant, fully welded frame hot-dip galvanised to BS EN ISO 1461:2009 as standard and can be polyester powder-coated in a range of RAL Colours.

SkootStor Bike Canopy

The SkootStor Bike Canopy is a truly versatile canopy and ideal for a wide range of outdoor classrooms or play areas, waiting areas, courtyard covers, entrances, available in standard 4 metre modules from stock, or as a tailored unit to suit your requirements.

The SkootStor Bike Canopy has been installed for a variety of applications for wall mounted, giving clear access and is ideal for situations where floor space is limited. The canopy is dipped galvanised and then powder coated to your colour choice. The canopy has a curved clear view cladding.

All our Shelters can be manufactured to be BREEAM compliant.
